May 2, 2016

Alabama Department of Economic and Community Affairs
Community and Economic Development Programs Division
Attention: Crystal Davis, Recreation and Conservation Programs Manager
P. O. Box 5690 Montgomery AL 36103-5690

Dear Ms. Davis:

Please find enclosed the Choccolocco Creek Watershed Conservancy District's application for the Recreational Trails Program grant.

Also attached are support letters from the Calhoun County Conservation District, the USDA Natural Resources Conservation Service office, the City of Oxford, Oxford Parks and Recreation Department, and the Calhoun County Commission expressing their commitment to participate in the outdoor recreational trails.

Our application will show that implementation of this grant will help provide outdoor recreational opportunities for area residents and surrounding communities.

If you have any questions regarding our application, please feel free to contact our Grant Administrator, Mr. Jennifer Yates at 256-835-7821, ext 3.

Sincerely,

A handwritten signature in cursive script that reads "Ed Land Jr.".

Ed Land Jr
Chairman
Choccolocco Creek Watershed Conservancy District

FY2016 Recreational Trails Program
Pre-Application Form
Deadline: Noon, Tuesday, May 3, 2016

Project Narrative

Brief Description of the Project
(350 characters or less)

The plans are to create a 3 mile canoe trail with 5 launch sites that will be connected to Choccolocco Park, the walking trail, and the outdoor educational trail located within the park.

1. Describe the degree to which the project's scope and feasibility meet the project area's recreational needs. (Key Consideration: Does the project appear to be feasible and incorporate a good project design with consideration given to the natural and cultural environment in which the project is located, and appropriate consideration given to needs and benefits?) 10 Points Available

Limit 1,000 Characters

The project feasibility is great as the City of Oxford owns the property for the proposed canoe trail. The trails will be on the City's property, and the city has agreed to partner with the Conservation District to create the project. The City will maintain the trail areas as they will be a part of Choccolocco Park.. The project will incorporate informational kiosks, and educational signage along the canoe trail highlighting safety along the waterways and also the ecological diversity of the watershed.

2. Describe the ways in which the project provides for the greatest number of compatible recreational purposes. (Key Consideration: An important concern is that this project will enhance the quality and quantity of recreational trail opportunities available in the community or region. Maximum points will be given to projects with connectivity to other trails or parks, environmental education and preservation, and economic development opportunities.) 10 Points Available

Limit 1,000 Characters

The canoe trail will increase the active and passive recreational opportunities offered by the trail thereby promoting physical and emotional well-being. The trail will increase connectivity and access through the trail head and the launch sites that are planned to be connected to the newly opened Choccolocco Park. The canoe launch sites will also be connected and have access to the walking trail along the West side of the park. Conceptual connectivity will be achieved through the education of the citizenry about the importance of preserving the ecological integrity of the Choccolocco Creek Watershed area. The Alabama Scenic River Trail has agreed to teach canoe and kayak safety classes for adults and children, and the Conservation District will be teaching conservation and watershed education. The City PARD day camp students will also be attending environmental and safety classes at trail outdoor classroom.

3. Describe the ways in which the project provides a new, unique, or more effective means for making trail opportunities available to the public. (Key Consideration: This criterion includes projects of national, regional, and local demonstration value. The most important concern is whether the grant recipient is committed to trying an approach that is new at the local level. Additional points are awarded for nationwide applicability and statewide or regional value. The applicant must commit to documenting the results of the demonstration.) 10 Points Available

Limit 1,000 Characters

The project plans to restore the historical Boiling Springs Bridge and to incorporate it into one of the canoe launch sites while also making it a part of the walking trail. The bridge is in a location that will connect to Choccolocco Park, the canoe trail, the walking trail, and the outdoor classroom / amphitheater area. This area of the trail is unique because of the connections to all trail components.

4. Describe the ways in which the project facilitates the access and use of trails by persons with disabilities, older citizens, economically disadvantaged, and other special populations or groups. (Key Consideration: Whether this project will expand recreation opportunities for special populations with recreation deficiencies.) 10 Points Available

Limit 1,000 Characters

The canoe trail will be connected to the Choccolocco Park which has plans for a boundless playground for physically impaired adults and children. The playground will have ramps for easy access for wheelchairs. Senior citizens will be able to enjoy the educational information at the Trail Head and at the Boiling Springs location even if they do not access the trail by canoe or kayak. All residents and visitors can enjoy the outdoors while being in a safe environment. The park has it's own police "Park Patrol" which are city police officers assigned to the park area. The park will be open at no charge to the public and will offer many park amenities associated with the connecting trails and park pavilions. The canoe trail will be open for a nominal fee.

5. Describe the ways in which the project creates opportunities for new partnerships between trail users, private interests, and public agencies within the project area. (Key Consideration: The major concern is that this project is a component of an integrated effort to enhance economic revitalization and community conservation. Maximum points will be given to applicants providing evidence of cooperative efforts with trail user groups and/or multiple public meetings.) 10 Points Available

Limit 1,000 Characters

The canoe trail and education areas are connected to Choccolocco Park and the park will also be hosting many events including but not limited to; soccer, track, baseball, softball, disc golf and rugby. These patrons and their families will be able to take advantage of the walking trail, canoe trail, and the outdoor classroom interpretive area. Many of the out of town patrons will be staying over night in area hotels and also shopping at the nearby Exchange Shopping Center which is only a half of a mile from the park. The trails will be good for the economic

6. Describe the ways in which the project uses the grant funds to leverage other public or private investments (in the form of services and materials as well as dollars). (Key Consideration: The major concern is whether actual leveraging is assured or the potential for leveraging is good, outside of any funds committed for the initial grant match. Maximum points will be given for applicants committing double the minimum local match or higher.) 10 Points Available

Limit 1,000 Characters

Chocolocco Park will be hosting many events at the park and the revenues generated will help maintenance for the walking trail, canoe trail, and the outdoor education interpretive trail. The creation of these trails will enhance and expand the recreational opportunities available at the park facility. The City of Oxford is committed to the success of the park and all connected trails and future opportunities.

7. Describe the degree of commitment to continue operation and maintenance of the project. Include an operation and maintenance plan detailing the amount of money needed to operate and maintain the trail after it is completed and identify who will be responsible for the work. (Key Consideration: Whether the grant recipient is willing to commit to continue the maintenance and operation of the project and whether the applicant provides a realistic operation and maintenance plan/budget. Maximum points will be awarded to applicants demonstrating innovative funding measures for trail maintenance.) 10 Points Available

Limit 1,000 Characters

The City of Oxford is committed to the success of the park and all connected trails and future opportunities. The canoe trail creation will enhance and expand the recreational opportunities available at the park facility. Many special events are currently planned for Choccolocco Park and many additional events are in the planning process. These events will generate revenue for the city and these revenues will help to distribute funds back into the budget for operation and maintenance of all park amenities including the connected outdoor trails.

8. The degree to which community involvement is addressed: i.e., (A) Project idea originated with trail users or a community group that has substantial knowledge, and (B) The private sector (including individual citizens, community groups, or local business enterprises) has participated in the development of the proposed idea and has made commitments of labor, money, or materials to support proposed implementation. (Key Consideration: The objective is to determine if the project is responding to citizen-identified needs. The priority of the project to users is evidenced by citizen support for the idea. Maximum points will be awarded to applicants demonstrating that the project concept was originally proposed at the grassroots level and, especially, for extensive citizen or private organization involvement in project development and support in project implementation. Maximum points will be awarded to applicants demonstrating extensive involvement and participation from citizens and interest groups during all phases of application development and commitments beyond.) 10 Points Available

Limit 1,000 Characters

The canoe trail, and other associated trails originated with the City of Oxford Parks and Recreation Advisory Board, and the Choccolocco Park Committee. The citizens on the advisory board suggested the creation of the trails and met with the park committee to help guide the process for the enhancement and expansion for the trails. The Parks and Recreation Department and advisory board has partnered with the Calhoun Conservation District and the Choccolocco Creek Watershed Conservancy on other projects and the educational component fit perfectly with the goals and objectives of the project.

9. Describe in detail how the trail will be managed. Include discussion on season length, hours of operation, limitations on use, enforcement provisions, and scheduling. 10 Points Available

Limit 1,000 Characters

The canoe trail will be operated and managed as a part of the Parks and Recreation Department. The maintenance for the canoe trail will include the grounds maintenance, and the up-keep and repair of the trail. All associated costs for the trail will be included in the Choccolocco Park Budget. The hours of operation for the canoe will be from 7:00 a.m. until 5:00 p.m.

10. Identify and describe the service area of the project. Approximately how many people do you propose to serve with this project? Identify other trail resources in the service area by trail type (motorized, non-motorized, multi-use), distance, location in relation to the proposed trail, and ownership. (Key Consideration: The RTP was created to address trail needs in the urban and rural areas of the state. In order to assess the need for additional trails it is first necessary to identify the quantity and location of existing resources within the service area. It is also necessary to establish a service area – either population or resource based. For example, a population based service area could be a neighborhood, school district, or political jurisdiction whereas, a resource based service area might be defined along a linear greenway, water course, or unique natural/cultural area. However, in both instances, an estimate of the number of beneficiaries should be provided.) 10 Points Available

Limit 1,000 Characters

There are currently no canoe trails within a 30 mile radius. This trail will also be connected to the planned walking trail, and outdoor education areas. The project also plans to restore the historical Boiling Springs Bridge and incorporate the bridge into one of the launch sites of the canoe trail. The canoe trail will be connected to other park amenities, and the project will cover approximately 43,786 households in the Oxford, and Anniston, area while the county has approximately 116,000 in population.

11. Identify the length of time the trail will be maintained and open and available to the public and identify the method to be used to ensure this commitment (deed covenant, deed restriction, etc.). (Key Consideration: The objective is to utilize RTP funds to the greatest extent possible by ensuring the improvements are maintained and available for public trail use as long as possible. Points will only be awarded to applicants exceeding the minimum required timeframe for a trail development project to remain open to the public. Maximum points will be awarded to applicants electing to maintain the improvements in perpetuity.) 15 Points Available

Limit 1,000 Characters

The City of Oxford plans to maintain the canoe trail area in perpetuity as it will be connected to Choccolocco Park. The west side of the park where the canoe trail launch sites will be located is in a restricted conservation easement and will remain in perpetuity. Permanently preserving this floodplain as green-space can provide a number of benefits: improve floodplain connectivity, provide flood storage that can lessen future flood impacts, reduce non-point source pollution, provide compatible recreational opportunities, provide wildlife habitat, preserve stream base flow during drought times, and educate the community on the importance of floodplain management.

Note: Property acquired with RTP funds must remain open to the public in perpetuity. Should the property cease to be open to the public for trail use, the applicant must repay the RTP 80% of the fair market value of the property at the time of the change in use. If the project is located on an easement or on leased land, the minimum timeframe for the easement or lease is 25 years. The project must remain open for public access for the use for which the RTP funds were intended during that time. For development projects on applicant owned property, the project must remain open for public assess for the use for which the RTP funds were intended for a minimum of 25 years.

Total Project Cost

Total Funds Requested

Important Note: The maximum grant amount by trail type is \$35,000 for non-motorized, single-use trails; \$100,000 for non-motorized, diverse-use trails; \$524,936 for motorized trails, or \$87,489 for education projects.

Program Information

Introduction

History and Purpose

The Recreational Trails Program (RTP) is a federal grant program authorized by Congress for the purpose of providing states, local governments, and private sector organizations with funds to acquire lands and develop and/or improve trail and trail-related resources.

Allocation of Funds for the 2016 Funding Cycle

The RTP funds are appropriated by Congress to the U. S. Department of Transportation, Federal Highway Administration (FHWA), and FHWA allocates the funds through state agencies as a grants program to sub-grantees. Alabama's allocation to sub-grantees in the 2016 funding cycle will be approximately \$1,609,000.

Division of Available Funds

The maximum grant amount by trail type is \$35,000 for non-motorized, single-use trails; \$100,000 for non-motorized, diverse-use trails; \$524,936 for motorized trails, or \$87,489 for education.

Thirty percent of Alabama's RTP funds must be used for motorized trail uses, 30 percent for non-motorized trail uses, and 40 percent for diverse trail uses. Diverse motorized projects (such as ATV and motorcycle) or diverse non-motorized projects (such as pedestrian and equestrian) may satisfy two of these categories at the same time. The State encourages applicants to consider projects that benefit both motorized and non-motorized users, such as common trailhead facilities.

Executive Summary of Proposed Activity

Proposed Activity

The purpose of the Choccolocco Creek Watershed Conservancy District's grant proposal is to help provide outdoor recreational opportunities through a canoe trail initiative to residents of Calhoun, and surrounding counties.

The goal of the program will be to create a canoe trail opportunity to include a Trail Head and launch site, with four (4) additional launch sites connected to Choccolocco Park. These launch site will be accessible for area communities as well as out of town patrons visiting the area.

The creation of the canoe trail will increase the active and passive recreational opportunities offered by the trail corridor thereby promoting physical and emotional wellness.

The grant will be used to provide a unique trail opportunity, while the community outreach campaign will increase public awareness of the value of these resources and build a greater constituency for regional environmental assets.

The program is requesting \$35,000.00 from the Recreation Trails Program to cover expenses associated with the development of this trail initiative, and for expenses associated with the community education and outreach programs. A breakdown of the planned expenses can be found in Table 1 - Summary of Project Costs (pg 4).

Trail Location - Choccolocco Park

Current Trails in the Area and Trail Location

There are currently no canoe trails within a 40 mile radius of the proposed canoe trail. This trail will also be connected to a planned walking trail, and outdoor education areas. The project also plans to restore the historical Boiling Springs Bridge and incorporate the bridge into a canoe launch site. The canoe trail will be about 3 miles in length and will also be connected to Choccolocco Park.

The canoe trail will be located on the west side of the newly opened Choccolocco Park in Oxford, AL. Choccolocco Park is located on Leon Smith Parkway which is only one mile south from Exit 188 off of I-20 in Oxford, AL. The trail is located within a half of a mile of The Exchange shopping on Leon Smith Parkway.

Population of Surrounding Areas

The trail project will cover approximately 43,786 households in the Oxford and Anniston area, and 116,763 in Calhoun County.

Proposed Outdoor Education

Partners Included in the Project

The Choccolocco Creek Watershed Conservancy District, the Calhoun County Soil and Water Conservation District, and the City of Oxford have agreed to partner together to establish a canoe trail along Choccolocco Creek for citizens and visitors alike.

Recreational Canoe Trail

Grant funds for the proposed project will provide for ingress and egress launch sites along the creek for an approximate 3 mile stretch along the west side of Choccolocco Park.

The partners plan to host education and outreach program days which will be scheduled during strategic events in the regional area to include but not limited to summer day camps, *Earth Day* events, *Renew Our Rivers* clean-ups, and *Creek Week*.

The events will also incorporate the Chambers of Commerce, and other area organizations for optimal marketing potential of the events. The events will be posted in the newspaper, and all social media outlets available including websites, Facebook, Twitter, etc.

The Choccolocco Creek Watershed Conservancy District is part of the Community Improvement Committee at the Chamber of Commerce where they partner to host *Renew Our Rivers* each year. The district helps sponsor these events and will work to incorporate the canoe trail into these and other outdoor education events.

Program Activity Reports

All invoices and documents regarding the project milestones will be maintained according to all reporting requirements.

Canoe Trail Expenses

Dear Chairman Land:

Thank you for the opportunity for the City of Oxford Parks and Recreation Department to be a partner with your organization in creating a canoe trail for area outdoor recreation. This project will be an asset to Choccolocco Park.

The Parks and Recreation Department is pleased with being included in the grant opportunity and is looking forward to great conservation education opportunities.

It is our understanding that the trails will be maintained through our department after they are developed.

Sincerely,

Don Hudson
Director
