Our grand little Town of Section is home to many fine, hard working people who take pride in their home, school and town. This grant for the walking trail at Weathington Park would be a great investment to our community and visitors. The people in our town have asked multiple times about somewhere to put a walking trail and have mentioned Weathington Park as a great place. Weathington Park has been mentioned for the striking views you would have of the Tennessee River, remarkable skyline and many other beautiful creations while strolling around the park. The walking trail would also be a great stop, stretch and even picnic area for the many travelers that come through our town; they could stretch their legs around the trail while taking in the beauty of the scenery. So while deciding where to go with this grant money please keep us in high consideration. If awarded the grant it would be a brilliant service to our community, the walking trail would be used greatly by people of all ages to help improve their health and overall well being. The Town of Section would be very thankful for a grant for the walking trail at Weathington Park.

Thanks

Ron Fossett
