To the Alabama Water Agencies Working Group (AWAWG),

Thank you for the opportunity to review the Water Management Issues in Alabama Report. The AWAWG has done a fine job of comprehensively outlining the water issue areas. The U.S. Army Corps of Engineers, Mobile District is supportive of the group's recommendation to adopt comprehensive statewide water resource policies and a statewide water management plan. We stand by ready to assist in these efforts. Should you have any questions please contact Mr. Curtis Flakes, Chief of the Planning & Environmental Division, at 251-690-2777 or at the email I placed on the CC above.

v/r

Steven

COL Steven J. Roemhildt

Commander, Mobile District
