

Innovations America, LLC

August 14, 2023

Chief, Digital Expansion Division

Alabama Department of Economic and Community Affairs (ADECA)

ADECA Digital Expansion Division:

Innovations America, LLC intends to submit an application for funding from the Capital Projects Fund program. Attached is a shapefile that represents our proposed funded service area for the Fiber Project for Etowah County. This project will be by Innovations America, LLC in cooperation with other ISPs and ADTRAN (an Alabama-based company) for current technology infrastructure.

We have reviewed the ADECA Grant Application and Guide documents and other related Accessibility Fund grant program documents and have complied with all relevant requirements. Innovations America, LLC consents to ADECA posting this letter and its attachments to its public website.

Our project will provide fiber optic, broadband connectivity that exceeds the 100/100 mandate for the grant. We plan to use arial and underground infrastructure and leverage existing dark fiber from companies such as Alabama Power.

For additional questions or inquiries about this letter of intent and our proposed service areas, please kindly contact me directly.

Respectfully,

A handwritten signature in blue ink that reads "James C. Burns". The signature is fluid and cursive, with the first letters of the first and last names being capitalized and prominent.

James C. Burns
President, CTO
