Subject: Letter of Intent - Application for CPF to Expand Broadband Access in Underserved Areas of Alabama

Dear Ms. Neighbors,

I am writing on behalf of Omnipoint Broadband to express our sincere intent to apply for grant funds through the Capital Project Funds Program administered by the Alabama Department of Economic and Community Affairs (ADECA). Our proposed project aims to bridge the digital divide by providing fiber to the premises with speeds exceeding 100/100 Mbps to underserved communities in Macon, Dallas, Wilcox, and Lowndes counties in Alabama.

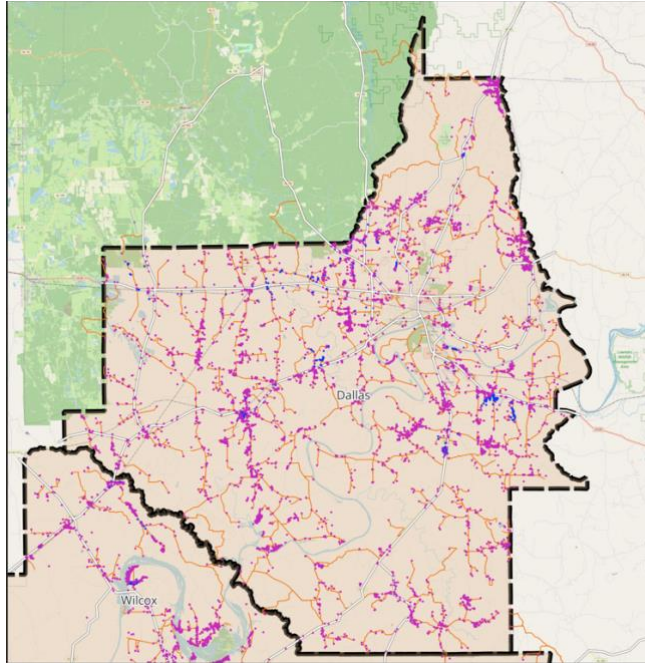

Omnipoint Broadband was founded in 2016, driven by the necessity to ensure his congregation could access streaming services. Since then, we have grown to serve thousands of customers across northern Virginia, western Massachusetts, and south-central Alabama. Our commitment to delivering reliable and affordable broadband services has led us to recognize the urgent need to address the connectivity gaps in rural Alabama.

The underserved county of Dallas face a significant disparity in internet access, with a large number of locations receiving less than 100/20 Mbps. The table provided below outlines the extent of the underserved areas in each county:

	Dallas
Underserved Serviceable Locations	5604
County Sq Miles	994.1
Serviceable Locations per Sq Mile	5.6
Total miles of fiber	946.8
Total Cost	\$37,872,000
Cost per passing	\$6,758

Our project involves deploying fiber-optic infrastructure to connect these underserved areas, thereby ensuring residents have access to high-quality internet services that will enable educational opportunities, telehealth services, economic development, and improved quality of life.

We are committed to working collaboratively with ADECA and local stakeholders to achieve the goals of the Capital Project Funds Program. Our team has a proven track record of successful broadband deployments and an understanding of the unique challenges rural communities face.

In the coming weeks, we will be submitting a comprehensive grant application that outlines the technical details, project timeline, community engagement strategies, and a clear breakdown of budget allocation. We are confident that our proposal aligns with the objectives of the Capital Project Funds Program and the broader vision of enhancing broadband access in Alabama.

We consent to posting the letter of intent and attachments to the ADECA website and the Alabama Broadband Map. We look forward to the opportunity to contribute to the advancement of internet connectivity in underserved areas and fostering digital inclusion for all Alabamians.

Should you have any questions or require further information, please do not hesitate to contact me at t.paul@omnipointtechnology.com or 413-785-8777.

Sincerely,

A handwritten signature in blue ink that reads 'Timothy Paul'.
