Subject: Fiber Internet

Yes, we live in the Bremen area and are interested in finding out more about your potential service.

1125 Co Rd 107
Bremen

I work from home full time and must be available and have the connectivity for live virtual meetings. We recently moved back here from KY and have sorely missed the great internet service we had available there. We currently are in the middle of 4 different services (Sardis, ATT Fixed Wireless, T-Mobile hot spot, and Verizon pre-paid) that we are trying to narrow down to what will work the best and be the most dependable. As you can imagine, we are paying a fortune for subpar service.

On top of me working from home, I have two teenage children that have had virtual classes, my husband and son love to stay in touch with friends from out of state via gaming, and we prefer to stream TV!

I look forward to seeing what you have to offer!
