Relative to your questionnaire forwarded to me by our HOA president.1. We are currently building and will be in our home by summer.2. Our only access to high speed internet will be via a Verizon hot spot.3. We would use your service for all the normal processes.4. In addition, we will be away some of the time and use it for remote irrigation, security system with cameras.
We hereby commit to using your service.

Is 25 mbps download and 3 mbps upload available to you? no - current service is capped at 5 mbps download/upload
What activities can you do with your current internet provider? Basic email and limited streaming - service is slow and unreliable (Online banking, browsing internet, social media, stream one device, stream multiple devices, gaming, etc)
What would you use JTM's Fiber Internet for? Online learning for kids, remote work from home, stream videos

How will JTM providing Fiber Internet impact your life? It will be a huge positive. I'm working from home and kids are remote learning. Very unreliable with current service. Fiber will enable my family to fully enjoy the lake. Reliable internet is the missing link today....fiber would be a life changer.

To JTM broadband I would like to say that at my house I do receive my internet from ATT. I don't know the speed; but it allows me to stream video and other usual functions. The quality is not consistently good however. I hope to have the opportunity to upgrade to your service. Best Wishes, joe Boggess

Ashley,

I just purchased a lot in the Dismal Bay subdivision and am aware that JTM Broadband may be able to run fiber internet into our subdivision. Just wanted to add my name to the list of interested customers. Can't speak to current internet access as we haven't built yet, but my neighbor tells me that access is painfully slow on the weekends when more people are at Smith Lake. This will only get worse as there is more building around the lake. We intend to use internet for streaming of multiple devices. I work from home and need to stream high res video images for radiology work.

Thanks for advocating for our area getting this service.
Robb Romp

Name: Jan Bates
Physical Address: 386 County Rd 3973 Arley, AL 35541
Phone Number: 337-281-8191
Email: batjb@bellsouth.net

Address is 386 County Road 3973, Arley, AL

Current provider is AT&T

Speed is 25-30 down and 3 – 5 up

No limitations on activities, the biggest demand we have is streaming one device or having multiple visitors that want to connect.

Would use fiber internet for online banking, browsing internet, social media, stream multiple devices

I expect a fiber connection to be more reliable and faster than the current internet service.

I currently have ATT fiber in another home in Lafayette, and started using LUS Fiber in another home in LA starting around 2005. I prefer a fiber connection if one is available at a reasonable cost and expected quality.

Hope this helps with your effort to bring fiber to our area.

Jan Bates

Dear Ashley,

I am so happy to see JTM Broadband expanding in the Arley, AL area. JTM's expansion to cover a greater area in Arley, AL has come with perfect timing.

Our current options for consistent broadband is extremely limited. As a resident of Arley, I can say that our connection provides inconsistent wifi service which creates the inability to utilize the internet as needed and upon demand. This has impacted us as we have had to remote work during the trying times of COVID restrictions.

JTM's fiber internet services will provide our students, K-12, instant and consistent access 24/7. Currently hot spots for our students are via school buses parked in limited areas. Students are falling behind on learning. JTM's presence and expansion in Arley / Winston Co., AL is a welcome service that is extremely needed now more than ever.

College students, businesses and individuals need JTM's fiber internet to this rural area, reaching far and wide, to ensure success for our community. Fiber service with 25 mbps download and 3 mbps upload will provide the ability to utilize the internet that is required for all residents and businesses.

Thank you for your commitment to our Arley community, residents and businesses.

With thanks and appreciation,

Barbara S. Wills

Dear Ashley,

I am so excited to see JTM Broadband expanding in the Arley, AL area. Broadband in Arley, AL has been scarce for years. At this time of need, and demand, JTM's expansion to cover a greater area in Arley, AL has come with perfect timing.

Currently, the options for consistent broadband, is extremely limited. As a resident of Arley, I can speak for our family, that our hot spot provides inconsistent wifi service which creates the inability to utilize the internet as needed and upon demand.

JTM's fiber internet services will provide our students, K-12, instant and consistent access 24/7. Currently hot spots for our students are via school buses parked in limited areas. Students are falling behind on learning. JTM's presence and expansion in Arley / Winston Co., AL is a welcome service that is extremely needed now more than ever.

College students, businesses and individuals need JTM's fiber internet to this rural area, reaching far and wide, to ensure success for our community. Fiber service with 25 mbps download and 3 mbps upload will provide the ability to utilize the internet that is required for all residents and businesses.

Thank you for your commitment to our beautiful community, residents and businesses.

With thanks and appreciation,

Joni L. Owens
