To whom it may concern:

I am writing because I would like to give my support to JTM Broadband in their quest to serve Lauderdale County, AL with fiber internet, and let the committee that chooses the recipient of the Alabama Broadband Accessibility Fund know how receiving this grant would better our community.

I am currently the owner of an insurance agency and we are having trouble with our current internet provider with the internet dropping service. This is a major problem with the business that we are in due to the majority of our sales and servicing of our customers is done solely on the internet.

I believe that if we are able to receive fiber internet our business will be able to reach new customers and help to maintain our current customer base. It will allow my employees to be more efficient with their time which impacts my business overall profit.

I am writing to urge you to approve this grant opportunity for JTM broadband that will allow them to serve internet customers in our local town and other communities in Lauderdale County.

Sincerely,

A handwritten signature in cursive script that reads "Kelly Aday".

To whom it may concern:

I am writing because I would like to give my support to JTM Broadband in their quest to serve Lauderdale County, AL with fiber internet, and let the committee that chooses the recipient of the Alabama Broadband Accessibility Fund know how receiving this grant would better our community.

1. My current situation with my internet provider is as follows: (Please list any relevant information about speeds, what you are unable to do with our current internet, etc.)

My family is experiencing speeds less than one megabit per second.

2. What are you able to do on your current package? Are you able to stream on multiple devices?

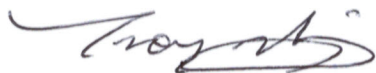

We are barely able to browse the internet much less stream anything.

3. Receiving Fiber internet will impact me by: (Please list how this will better your life, i.e., gives me better access to healthcare)

Better access to work assignments.
Better streaming for our children
Online gaming can actually happen.

Sincerely,

Troy Morris

1. My current situation with my internet provider is as follows: (Please list any relevant information about speeds, what you are unable to do with our current internet, etc.)
~~get~~ get internet that is fast and able to stream
2. What are you able to do on your current package? Are you able to stream on multiple devices? Use wifi occasionally and no you can only use up to like two.
3. Receiving Fiber internet will impact me by: (Please list how this will better your life, i.e., gives me better access to healthcare) being able to do homework for school.

Sincerely,

Brianna Aldridge

1. My current situation with my internet provider is as follows: (Please list any relevant information about speeds, what you are unable to do with our current internet, etc.)

AT&T is basically my only option. Their lines go down fairly often.

2. What are you able to do on your current package? Are you able to stream on multiple devices?

I am able to stream on multiple devices. Sometimes the devices do run slow.

3. Receiving Fiber internet will impact me by: (Please list how this will better your life, i.e., gives me better access to healthcare)

It will allow my business to have options for internet. AT&T currently has no real competition. It should allow my devices to run at faster speeds.

Sincerely,
