

A.4 Update

The addresses in this project are currently unserved by any fixed broadband provider offering service of 25 Mbps download, 3 Mbps upload. While it does not meet the map criteria, ADECA has pre-approved Mediacom Communications to show documentation that these addresses are unserved. Currently, the only fixed broadband provider in the area is AT&T. When these are searched by AT&T serviceability, these addresses are clearly shown as unserviceable. If more examples are needed, they can be provided.

The screenshot shows the AT&T website interface. At the top, the address is listed as "Your address 12837 JOE CARTER RD 36507". Below this, there are two main sections: "TV" and "INTERNET". The "TV" section has an "Add" button. The "INTERNET" section has a message: "Internet isn't available. We're sorry, Internet isn't available at your address. 12837 JOE CARTER RD, BAY MINETTE, AL 36507. Enter a different address >". A "Chat live" button is visible in the bottom right corner. The footer contains "Find a store" and "About AT&T" links, along with social media icons for Facebook, Twitter, and LinkedIn.

The screenshot shows the AT&T website interface for a different address: "Your address 12757 JOE CARTER RD 36507". The "TV" section has a "Remove" button. The "INTERNET" section has a message: "Internet isn't available. We're sorry, Internet isn't available at your address. 12757 JOE CARTER RD, BAY MINETTE, AL 36507. Enter a different address >". A "Chat live" button is visible in the bottom right corner. The footer contains "Find a store" and "About AT&T" links, along with social media icons for Facebook, Twitter, and LinkedIn.
