

To whom it may Concern:

As the owner of Mill Creek Lumber, located in Haleyville, AL, I would like to stress the importance of more reliable and faster internet service. Internet service in today's time is essential. Currently, we have no access to a high-speed connection. It's very difficult to compete with our competitors who can offer faster and better services because their internet service is much quicker. With a service such as Freedom Fiber, we would be able to have better productivity and perhaps have a chance to expand and better serve our community and customers.

We need something more advanced in our rural town in order to keep businesses, people, and schools in our area. We need more opportunities in this area. High speed internet is no longer a "want" to many businesses and schools, it's a necessity. In order for people to be successful and businesses to thrive, we must have the capability and the right tools and resources to do so. We are in full support of Tombigbee Communications' fiber initiative, which will provide a true high speed broadband to every home and business in our area. We are awaiting the opportunities this service will bring to our company and individuals in our community. We stand completely behind Tombigbee Communication as they work to boost the economic development in Northwest Alabama.

Sincerely,

A handwritten signature in black ink, appearing to read "David Miller". The signature is fluid and cursive, with a large initial "D" and "M".

David Miller
