To Whom It May Concern,

With today's Healthcare advanced technology, we have the ability to offer patients the use of our Patient Portal. Patient Portal can be accessed from the patient's home and offers the ability to view their test results, make appointments and email their provider and nurse. Our patient population is in a rural area and the internet service in this area is of poor quality. The patients and community would benefit of a service that would meet their needs in today's advanced technology environment. If you have the ability of offer this benefit for our community, it would greatly be appreciated. If you have any questions that I may could answer, please contact me at 205-921-6326 or email me at sbelue@nmhs.net.

Thank you,

Susan Belue
Office Manager
Hamilton Primary Care Center
