To Whom it May Concern:

I would like to express the importance of broadband in a rural community. As you know, our rural areas have not had the same opportunities as those in the larger areas. However, with the promise of a true high-speed connection from Tombigbee Communications' freedom FIBER, we have a chance. We have a chance to encourage more businesses to recruit to our area. We can improve our health care systems and our education system. We also have the chance to improve the overall quality of life in our communities.

At the Winfield Public Library, we are proud supporters of freedom FIBER. With this high-speed connection, we can open our doors to those in the community and allow them to use this world-class service. We can allow students to complete assignments or submit applications in the comfort of their community library. With the increase connectivity offered by freedom FIBER, we have the chance to better serve those who visit us at Winfield Public Library.

We are excited to see freedom FIBER expand into more of the most rural parts of our community. Those people have little to no internet connection at all but have no access to a high-speed connection. With freedom FIBER, they will now have access to a minimum of 100 Mbps. It's a game changer for rural Alabama, and we are proud to stand behind Tombigbee Communications and their efforts to enhance this area of Northwest Alabama.

Thank you!

Sincerely,

Regina Sperry

Director
