

Appendix A

Hydrologic Regions, Subregions, and Subbasins in Alabama

The Mobile and Tennessee Rivers are the major river systems in Alabama. Within Alabama, the Mobile River comprises 46 subbasins and 5 subregions while the Tennessee River comprises 7 subbasins and 2 subregions. The hydrologic classification scheme used for this report and the following table (A-1) is from the USDA, Soil Conservation Service Publication, State of Alabama Hydrologic Unit Map with drainage areas by county and subbasin, March 1993: Federal standards for delineation of hydrologic unit boundaries, version 2.0, October 1, 2004. Table E-1 lists each hydrologic region with its associated subregions and subbasins by hydrologic unit code and name.
