Legend
No Drought Declaration
Advisory
Watch
Warning
Emergency

Conditions around the state have improved due to the frequent, and in some cases, significant rainfall amounts. Reservoirs are within operating guidelines and streamflows and groundwater levels are within normal ranges. In recognition of these conditions, the Drought Advisory designation has been removed from all Alabama Drought Regions. OWR will continue monitoring our water resources and update this Declaration as needed.

Water managers are urged to carefully monitor conditions and encourage the wise and efficient use of our water resources. Public water system customers are encouraged to follow their local water system’s recommendations regarding water use. All other water users should make prudent decisions on their water use to protect available resources.
