None None

Legend
No Drought Declaration
Advisory
Watch
Warning
Emergency

Conditions around the state remain drier than normal and both short- and longer-term forecasts predict below normal levels of rainfall for Alabama. While reservoirs are within operating guidelines, streamflows and groundwater levels will continue to be impacted by the lack of rainfall. In recognition of these conditions, all Drought Regions are declared to be at the Drought Advisory level. OWR will continue monitoring our water resources and update this Declaration as needed.

Water managers are urged to carefully monitor conditions and encourage the wise and efficient use of our water resources. Public water system customers are encouraged to follow their local water system's recommendations regarding water use. All other water users should make prudent decisions on their water use to protect available resources.
